CHASSIS

COMPLETE CHASSIS

We offer a comprehensive chassis service supplying complete chassis in a variety of finishes and also supplying individual chassis parts, many of which were not available originally as separate items.

Our chassis are sold on an exchange basis therefore we will need your old chassis back. We need the old chassis as there are some pressed and turned parts of the original chassis that never wear out or corrode badly and these parts are not cost effective to remanufacture.

Our chassis therefore are best described as remanufactured. What you will receive is a chassis that will have a combination of new parts and original parts depending on what chassis parts we have in stock at the time. This may mean that if we have a suitable chassis in stock to use as a starting point for your chassis, then one or both main chassis rails might be original in total or in part. In any event, the chassis you will receive will have been built on our assembly jig and will be strong and fit for purpose. Any parts we use from original chassis are shot blasted before incorporation into our remanufactured chassis.

We never repair a bent chassis. All chassis we receive that have suffered accident damage are cut up and are remanufactured using one or two new main chassis rails as necessary to ensure all evidence of an accident are eradicated.

If you are not able to let us have your old chassis before or at the time of collecting your remanufactured chassis, a deposit will need to be paid until we receive an old chassis from you. This cost is covered by part number RTR7286.

Our chassis units, can be supplied as follows: -

1. Remanufactured, unpainted. Please see part numbers below for the basic chassis part number for individual models. The chassis will be supplied in bare steel in as welded condition. We offer two painting services at extra cost
2. As 1. Above painted with etch primer only.
3. As 2. Above painted with etch primer and a black top coat.

NOTE: All TR4A-6 chassis incorporate our front suspension and diff strengthening modifications, as the standard chassis is weak in these areas.

301217L	TR2-3 chassis frame. Lockheed brakes type
301217G	TR3-3A chassis frame. Girling brakes type
304856	TR4 Up to CT4387 disc wheels and CT4689 wire wheels. This chassis has short A and B post outriggers and uses an extension bracket to space out to the body brackets (not supplied). The steering rack is vertically mounted
305719	TR4 middle range chassis frame with vertical rack mountings and long outriggers.
305984	TR4 late chassis frame with horizontal rack mountings and long outriggers
402335	TR4A Rigid axle chassis frame. This chassis does not have the mountings for the IRS differential
402284	TR4AIRS chassis frame

Be aware that there are slight differences between the differential mountings fitted to TR4AIRS cars and later cars. The differential support pins protrude downwards 157mm on TR4A cars and 162mm on later cars, as the rear mounting arrangement is different between TR4AIRS and later cars. Therefore a TR4A chassis cannot be used for a TR5-6 or visa versa unless the engine and differential mounts are changed.

402547	TR5, 250, 6CP chassis frame.
--------	------------------------------

PKC21	TR6CR chassis frame.
RTR7099	Cost to incorporate the weld on parts to accept our telescopic rear damper kit. TR4AIRS-6.

Please remember that all chassis ordered under the part numbers above will be supplied in bare steel as taken out of the assembly jig with no treatment at all, Revington TR offer the treatments below.

CHASSIS TREATMENT

Please use the following part number to add a finishing process to your chosen chassis

RTR7095	Shot blasted, etch primed and paint black.
RTR7095-1	Shot blasted and etch primed only.

REPLICA RALLY TR2-4 & TRS CHASSIS & PARTS

RTR7027-1	Remanufactured TR3A chassis including rally strengthening modifications
RTR7028	Remanufactured TR4 chassis including rally strengthening modifications

These chassis include all the strengthening modification the factory incorporated into the works TR4 rally cars.

RTR7027-2	Remanufactured TR3A chassis including less extreme rally strengthening modifications than RTR7027
RTRS7001	Chassis strengthened and lengthened for TRS, based on TR4 chassis

The following kits allow customers to convert their own chassis.

RTR7243K	TR2-4 Fast road chassis strengthening kit omitting the more complex parts of kits RTR7236-1K and RTR7084-1K. Useful for those using their cars for fast road use and milder road rallies.
RTR7236-1K	TR2-3B Complete kit of steel parts to convert a standard TR2-3B chassis to rally specification. This kit does not include new damper mountings and is intended for use with standard DAS 9 dampers. The damper mount strengtheners supplied in this kit are not easy to fit to TR2-early TR3A with sloping rear floors. The body needs to be lifted at the back or some strengtheners left off where no access is available for welding. The kit is easier to fit on cars fitted with post TS60000 body shells with flat rear floors or when the body is separated from the chassis.
RTR7236-2K	TR2-3B Complete kit of steel parts to convert a standard TR2-3B chassis to rally specification, including new damper mountings for DAS10 dampers. This kit can only be fitted to TR2-early TR3A with sloping rear floor if the sloping floor is modified. This kit is easier to fit to cars with post TS60000 body shells with flat rear floors or when the chassis separated from the body.
RTR7084-1K	TR4 Complete kit of steel parts to convert a standard TR4 chassis to works rally specification. This kit does not include new damper mountings and is intended for use with standard DAS 9 dampers.
RTR7084-2K	TR4 Complete kit of steel parts to convert a standard TR4 chassis to works rally specification, including new damper mountings for DAS10 dampers.
RTR7084-3K	TR2-4 Weld on radiator shield, supplied separately, as used in RTR7084-2K

CHASSIS COMPONENTS SUPPLIED SEPARATELY

Note: - This list only covers parts NOT listed on Triumphs original drawing, these are supplied under their original part numbers.

506721C	TR2-3A starting handle guide chrome plated
506721P	TR2-3A starting handle guide plain
RTR7283	TR2-3B front body mount on cross tube
RTR7285L	TR2-3B bump stop on turret LH
RTR7285R	TR2-3B bump stop on turret RH
RTR7025-1	TR2-4 outrigger with long tube, replaces whole tube right through chassis
RTR7025-2	TR2-4 outrigger with short, smaller diameter tube. Used as a repair part to pass inside original tube
RTR7015	TR2-4 chassis saddle without tube
RTR7024	TR2-4 cross tube rear (small) 1¼+o/d
201990	TR2-4 cross tube rear (large) 1¼+o/d
201990R	TR2-4 cross tube rear (large) 1½+ o/d useful when repairing a chassis as this tube slides inside the remains of original tube 201990
RTR7026-2	TR2-3B shackle mounting
RTR7026-4	TR4 shackle mounting with rear strengthener to take the rear bumper outrigger
RTR7010	TR2-4. Turret assembly front suspension LH
RTR7011	TR2-4. Turret assembly front suspension RH
RTR7165	TR4. Turret major assembly front suspension LH
RTR7166	TR4. Turret major assembly front suspension RH

The above two numbers include the support tube and pin to chassis brackets

RTR7542	TR2-4 Repair pin, lower inner fulcrum. This pin is designed to repair the end of fulcrum, lower inner wishbone pin 106196 and consists of a stepped bar which passes over the remaining pin once the damaged part is removed and introduces a new working surface. Order one per position. Needs welding on. Order RTR7543F & R as necessary.
RTR7543F	Triangular bracket supporting 106196 and RTR7542 forward of the turret
RTR7543R	Triangular bracket supporting 106196 and RETR7542 Rear of turret.
RTR7077	TR2-4 ring in turret supporting road spring
RTR7184	TR4 front body mounting. Per pair
RTR7013	TR4 early rack mounting LH
RTR7014	TR4 early rack mounting RH
RTR7008	TR4 late. Rack mounting LH
RTR7009	TR4 late. Rack mounting RH
RTR7018	TR4A-6 top breastplate - with flutes
RTR7022	TR4A-6 bottom breastplate - with flutes
RTR7005	TR4A-6 Chassis rear leg LH, no fittings. 60" long
RTR7006	TR4A-6 As above RH
RTR7068	TR4A-6 Chassis side leg LH. No fittings full length
RTR7069	TR4A-6 As above RH
RTR7003	TR4AIRS-6. Front bridge assembly (comprising 1 x 214107 cross member, 1 each support 307107, 307106).
RTR7242	Bracket on bridge supporting body TR5-6. Can be used on TR4A too.
RTR7004	TR4A-6. Bridge rear. Holds differential and rear dampers.
RTR7030	TR4A-6 chassis leg trailing Arm attachment including bolt hole strengthening tubes
RTR7001	TR4A chassis rear section complete including bridges
RTR7002	TR5-6 chassis rear section complete including bridges
RTR7031	TR4A-6 Chassis rear cross tube

RTR7029	TR6CR Chassis mounting plates. Supporting gearbox/overdrive. 2 required.
RTR7007	TR5-6 Bumper side support attachment (part of chassis). Suits left and right side.

CHASSIS STRENGTHENING KITS

See Section Replica Rally chassis and Parts above for Rally chassis specific chassis strengthening parts. The following parts are intended to strengthen standard chassis where the original design is weak, and standard road cars, without these modifications are prone to failure.

RTR7163	TR2-6 additional strut from engine bay body mount to turret. Not part of works specification but a useful addition.
RTR7150-23B	TR2-3B Support strut Turret to chassis box section.
RTR7150-4	TR4 Support strut Turret to chassis box section.
RTR7150-4A6	TR4A-6 Support strut Turret to chassis box section.
RTR7043K	TR2-4 Strengthened rear damper mounting kit for RTR3313 DAS10 dampers.
RTR7118K	TR2-4 Strengthened. Inboard face of standard rear damper mountings (DAS9 type). Kit of 8 parts intended for use with our rear anti roll bar kit, but can be used without, with simple modification. Requires welding.
RTR7017K	TR4A-6 front suspension-strengthening kit. The lower inner wishbone brackets welded to the chassis are prone to breaking away. Our kit will help prevent this happening
RTR7012-1K	TR4AIRS-6 Diff mount strengthening kit for fitment to chassis with body off
RTR7012-2K	TR4AIRS-6 for fitment to chassis with body fitted

RADIATOR, ENGINE AND GEARBOX UNDERSHIELDS

RTR7084-3K	TR4 weld on skid shield as used on the works rally cars, can be used on TR2-3B if reduced in width use in conjunction with RTR7159K
RTR7128K	TR2-3B Aluminium sump guard kit, extends from in front of the radiator shield to the back of the sump
RTR7129K	TR4 aluminium sump shield similar to RTR7128K above
RTR7159K	TR2-4 aluminium full engine and gearbox under-shield. Used when welded on front skid employed. As per TR4 works rally car
RTR7130K	TR4A-6 Aluminium sump guard, extends from the radiator shield to the back of the sump

CHASSIS TO BODY MOUNTING PARTS

MOUNTING PAD KITS

BMKPA2-4	TR2-4 Body to Chassis packing kit Alloy
BMKPN2-4	TR2-4 Body to Chassis packing kit Nylon
BMKPA4A-6	TR4A-6 Body to Chassis packing kit Alloy
BMKPN4A-6	TR4A-6 Body to Chassis packing kit Nylon
CD26326N	TR2-6 nylon 'C' packer used in kits available individually.

MOUNTING BOLT KITS

BMKB2-3A	TR2-3A {Kits include all nuts, bolts
BMKB4	TR4 {washers and spring
BMKB4A-6	TR4A-6 {washers.

BODYWORK

TR2-3B BODY SHELLS AND BODY SHELL COMPONENTS

TR2-3B COMPLETE BODY SHELLS

Revington TR are proud to be able to offer complete body shells for all - Yes All, variants of TR2-3B, seven types in all. Available in steel (or aluminium to special order). Our shells are built on our own jig and include hinges and catches on complete shells.

Our shells are supplied under original part numbers excluding a bonnet. Bonnets can be supplied in steel or aluminium as required. Also, currently we have a stock of good second-hand bonnets.

We also offer complete shells, with an original good bonnet. The part numbers below should be used as a guide as often, a better product can be produced using parts of your existing shell (if you have one!).

556414	TR2-3B complete body shell in transport primer . including bonnet
556414LB	TR2-3B complete body shell in transport primer . less bonnet
556414LRP	TR2-3B body shell less all removable panels.

Please phone to discuss requirements before ordering.

TR2-3B BODY SHELL COMPONENTS

Having been able to supply complete body shells for some time now, it follows that EVERY SINGLE BODY PANEL IS AVAILABLE SEPARATELY. Revington TR have contributed to this situation directly by establishing the manufacture of handmade body panels including bulkheads and inner wings to complement the small range of pressed panels on the market

Revington TR now have a major commitment to the TR2-3B owner in helping to preserve the marquee and are now responsible for the manufacture of the following panels.

Front Outer Wing, Front Wheel arches, Front Valances, Bulkhead, Battery Boxes, A Posts, Bonnets, Door Skins, Rear Floors, Rear Wheel arches, Inner Quarter Panels, Outer Sills, Boot Lid, Rear Outer Wings.

All panels are available under original part number. The part numbers listed below should be used when an original number cannot be found.

901270AL	TR2-3B front wing aluminium LH
901271AL	TR2-3B front wing aluminium RH
901270RP	TR2-3B repair section in steel for the lower main part of the front LH wing
	Same as 901271RP for RH.
901271RP	TR2-3B rear wing aluminium LH
900612AL	TR2-3B rear wing aluminium RH
900613AL	TR2-3B bracket LH front inner wing to chassis
RTR7034	Same as RTR7034 for RH.
RTR7035	TR2-3B Nacelle. RH front inner wing to allow larger air filters to be fitted, particularly useful when Webbers and EFI air boxes are used. Shaped to fit the inner wing. Requires the radiator stay bracket to be moved forward slightly.
RTR7046	TR2-3B tank strap nut plates on underside of rear floor. Four required per car
RTR7103	Bracket, front apron tie member support
553035F	TR2-3 short doorframe LH
553036F	TR2-3 short doorframe RH
900491RP	TR2 long door. Door skin LH
900492RP	TR2 long door. Door skin RH
553035RP	TR2-3 short door skin LH
553036RP	TR2-3 short door skin RH
553035RPAL	TR2-3 short door skin LH. Aluminium

553036RPAL	TR2-3 short door skin RH. Aluminium
901210RP	TR3A-B short door skin LH with handle plinth
901211RP	TR3A-B short door skin RH with handle plinth.
901210RPAL	TR3A-B short door skin LH with handle plinth. Aluminium
901211RPAL	TR3A-B short door skin RH with handle plinth. Aluminium
900409S	TR2-3B saddle rail (support centre tonneau panel)
900433CS	TR2-3A Pre 60K boot aperture channel set comprising of two side channels and one rear lip.
900666AL	TR2 bonnet Dzus type in aluminium. All other TR2-3B bonnets are available in ally or steel.
RTR7111	Cost to louver TR2-3B bonnets, both steel and aluminium. To special order.
901273LFR	TR2-3A bulkhead front panel LH of battery box from scuttle to floor. RHD
901273RFR	TR2-3A bulkhead front panel RH of battery box from scuttle to floor. RHD
901273LFL	TR2-3A bulkhead front panel LH of battery box from scuttle to floor. LHD
901273RFL	TR2-3A bulkhead front panel RH of battery box from scuttle to floor. LHD
RTR7085	TR2-3B Centre bulkhead panel. Below the battery box
950014EPL	TR2-3B Bulkhead end panel left side. The side of the bulkhead against the passengers left foot in a RHD car. Not indented for LHD, as it is not necessary. This panel is supplied flat under this part number. Originally this panel had an indent to allow a LHD driver to operate the dipswitch. This indent is neither needed nor visible in a trimmed RHD car.
950014EPR	TR2-3B Bulkhead end panel right side. The side of the bulkhead against the driver's right foot in a RHD car.
950014EPLLHD	TR2-3B Same as 950014EPL except it has the indent for LHD cars where the driver's left foot needs more room to find the dipswitch.
RTR7023	TR2-3B. Bracket in RH boot drain channel to accept boot lid prop.
BOD1	TR2-3B Battery box. Part of the bulkhead, supplied separately
RTR7277	TR2-3B Fibreglass bulge for the right hand side of the transmission tunnel to allow the fitment of an electronic signal transmitter for an electronic speedometer. Only required on overdrive cars.
RTR7282	TR2-6 Catch plate/retainer inner quarter panel that the hood frame is screwed to.
RTR7016	TR2-3A Pre 60K rear valance to boot floor support. Can be used for TR3A Post 60K and TR3B.
603559	TR2-6 Tag securing wing loom . general use.
RTR7541K	TR2-3B Front wing drainage kit incorporating parts to improve the boot channel drainage too

TR3 BETA REPLICA PARTS

One of Triumph's many prototypes involved using the wider track TR4 style chassis with a modified TR3A body shell. This prototype was called BETA.

Revington TR have reproduced these wing sets and door skins in fibreglass so that customers wanting to use the wider TR4 chassis can do so. The cockpit space is of course the same. The parts are a direct fit onto a standard TR2-3B body shell without the need for inner wing modifications. The exception to this is the need to bring the sills out at the front to meet the line of the wing/ door profile.

901210BETAFG	Beta door skin Fibreglass. LH
901211BETAFG	Beta door skin Fibreglass. RH
901210BETAAL	Beta door skin Aluminium. LH
901211BETAAL	Beta door skin Aluminium. RH

901270BETAFG	Beta Front wing Fibreglass. LH
901271BETAFG	Beta Front wing Fibreglass. RH
901270BETAAL	Beta Front wing Aluminium. LH
901271BETAAL	Beta Front wing Aluminium. RH
900612BETAFG	Beta Rear wing Fibreglass. LH
900613BETAFG	Beta Rear wing Fibreglass. RH
900612BETAAL	Beta Rear wing Aluminium. LH
900613BETAAL	Beta Rear wing Aluminium. RH

BETA GRILL

We have been asked a few times if we can supply such a grill but sadly these are not a production part. This is the situation as of November 2019 but this may change in time.

The grill bars fitted to Beta replica SCO110B were handmade (longer than necessary) then individually fitted to the front apron. We would be happy to make the bars again and supply the dimensions for the spacing of the bars however the handmade nature of the parts would mean that the bars alone would be eye watering expensive. For more information see our website

<https://www.revingtontr.com/tr3/chassis/bodywork/tr3-beta-replica-parts/beta-grill>

TR2-3B ALUMINIUM PANELS

We can supply ANY body panels from a complete body-shell to individual body parts in aluminium. Where these items are supplied regularly, prices will be found in the price list under original part number with AL suffix or with an RTR prefixed part number in the appropriate section.

Please enquire if a price is not listed.

TR2-3B BODY FITTINGS, BADGES etc.

In addition to the standard range of bonnet and boot hinges for TR2-3B, we offer a higher quality range cast in aluminium-zinc alloy. These hinges are very strong, and incorporate stainless steels hinge pins. A little extra cost- but worth it in the long run.

602092HQ	TR2 bonnet hinge un-chromed LH
602093HQ	TR2 bonnet hinge un-chromed RH
602930HQ	TR2 boot hinge un-chromed LH
602931HQ	TR2 boot hinge un-chromed RH
650021HQ	TR3-3B bonnet hinge chrome plated LH
650022HQ	TR3-3B bonnet hinge chrome plated RH
650023HQ	TR2-3B boot hinge chromed plated RH
650024HQ	TR3-3B boot hinge chromed plated RH
WFK23	TR2-3B wing fitting kit includes cages and counter sunk screws for door hinges
TR3ADLS	TR3A five piece lock set including door handles, ignition switch tumbler, cubby lock and boot lock all with two keys
556034FK	TR2-3B hard top fitting kit includes all brackets and screws, protective plates required to fit hard top
552559X	TR2-3B spare wheel seal, small section. The spare wheel lid never fits well. This small section seal may help the lid to sit closer to the rear valance
607070X	TR2-3 boot lid lock with 2 keys
RTR7064	TR2-3B strap set spare wheel and tools
RTR5269K	TR2-3 engine bay rubber plug and grommet set
RTR7080	TR3A-3B Stay bar LH chassis to front valance, when neither bumper nor bumper irons are fitted
RTR7081	TR3A-3B RH version of RTR7080
552901	Clip. Door seals to door and scuttle. 44 required
700896	TR2-3 Aero screens. Copy of the original item. Per pair.
700896D	TR2-3B Aero screen, Derrington type. Priced each.

700896DFK	TR2-3B Car set of feet to suit Derrington Aero screen.
602001S	TR2-3B overrider rear distance piece . replaces 602001 and long bolt.

ITALIA BODY SHELLS AND BODY SHELL COMPONENTS

Revington TR is proud to announce the latest achievement in keeping the TR marquee alive and well, complete new Italia body shells. These shells originally manufactured by Vignale to a Michelloti design were manufactured in steel. The Revington TR Italia shell is produced in aluminium but can be manufactured in steel to special order.

Visit our website home page and click on the Italia Icon for more information.

COMPLETE ITALIA BODY SHELLS

RTRI7000AL	Body shell Italia, aluminium, complete with doors, bonnet and boot lid
RTRI7000	As RTR7000 in steel (special order only).

ITALIA BODY SHELL COMPONENTS

RTRI7125	Front windscreen Italia glass
RTRI7249	Seal front windscreen Italia manufacture from Silicone rubber
RTRI7002	Front Grill
RTRI7003	Badge Set
RTRI7003-1	Bonnet badge says Italia 2000
RTRI7007	Bonnet, Fibreglass
SPF2188K	Bonnet Buffer. Set of 6
RTRI7008	Boot Lid, Fibreglass
RTRI7251	Rear number plate surround
RTRI7252	Front grill surround
RTRI7009	Rubber block on B-Post
RTRI7013	Rear windscreen Italia glass
RTRI7250	Seal rear windscreen Italia manufacture from Silicone rubber.
RTRI7012	Front lamp bar (without bumper fitted)

TRS le MANS BODY SHELLS AND BODY SHELL COMPONENTS

Following on from the successful announcement of our Italia body shells, we now offer the evocative TRS le Mans body shells in aluminium. These shells can be used to rejuvenate a tired TR2-4 by transplanting the vital components. The Imaginative could use a TR4A-6 as a donor too.

Visit our website home page and click on the TRS icon for more information.

COMPLETE TRS BODY SHELLS

RTRS7000AL	Body shell TRS aluminium complete with doors, bonnet and boot lid.
RTRS7001	Chassis strengthened and lengthened for TRS, based on TR4 chassis

TR4, 4A, 250 & 5 BODY SHELLS AND BODY SHELL COMPONENTS

COMPLETE TR4, 4A, 250 & 5 BODY SHELLS

As with TR2-3B bodywork Revington TR are justifiably proud of their contribution to the TR4-4A-5-250 range of body panels.

Revington TR can now offer complete body-shells for TR4-250. These can be supplied as a tub or with all outer panels. Please ring to discuss your requirements. As a guide the tub prices for TR4 are listed below.

950112LRP	TR4-5 body shell LHD less removable panels
950113LRP	TR4-5 body shell RHD less removable panels
574351	TR4-5 RHD complete shell including outer panels
574352	TR4-5 LHD . TR250 complete shell including outer panels.

All these shells can be supplied in Aluminium, as either complete Aluminium shells inside and out, or as steel inner shell, with Aluminium outer panels.

In addition we can of course supply shells to full works rally car specification. Please ask for details.

These part numbers should be used as a guide as often, a better product can be produced using parts of your existing shell (if you have one!).

TR4, 4A, 250 & 5 BODY SHELL COMPONENTS

PARTS UNCLEAR IN TRIUMPH'S TR4-4A-5-250 PARTS CATALOGUES

850430FT	TR4-6 Felt insert for side window channels
904005	TR4A-6 LH floor panel (also use for TR4)
904006	TR4A-6 RH floor panel (also use for TR4)
705218	TR4-6 Bracket for column on bulkhead LHD
705219	TR4-6 Bracket for column on bulkhead RHD
615968	TR4-4A LH seat belt anchor at base of B post
615969	TR4-4A LH Seat belt anchor at base of B post
811944RC	TR4-5 front inner wing rain channel LH
811945RC	TR4-5 front inner wing rain channel RH
850351LTR	TR4-4A LH top bulkhead panel RHD extends to battery tray
850351LTL	As 850351LTR for LHD
850351RTR	TR4A RH bulkhead panel RHD extends to battery tray
850351RTL	As 850351RTR for LHD
815834C	TR4-6 Centre top bulkhead panel with battery clamp lugs
603344	TR4 CT22344on+TR4A-6. Spring check strap guide, fitted in 'A' post.
RTR7152	TR4-5 seal, rear of side window, in back light, when back light is required to be removable.
RTR7151	TR4-5 seal retainer hardtop back light
GAC6400X	TR5 lock set. Complete set of locks for doors, boot, ignition and glove box.
750229	TR4-6 bonnet stay bracket.
RTR7051	TR4-4A horn bracket on front inner wing LH
RTR7052	TR4-4A horn bracket on front inner wing RH.
RTR7281A	Nut Plate front inner wing, securing bonnet hinges
850379X	TR4-5 lower tonneau sides usually part of the rear valance, but supplied as a separate pair under this part number.

Originally the rear deck of a TR4-4A-5 and 250 were supplied as a single item comprising a centre deck, two forward and two rear deck panels (sometime called tonneau panels) under the following part numbers.

850346	TR4 rear deck assembly. Up to CT5642
806820	TR4 rear deck assembly. From CT5643
808776	TR4A-5 rear deck assembly

These are now not available as a complete assembly. Please use the following panels.

808776RP	TR4A-5 centre deck.
815521	TR4A-6 LH forward tonneau panel.
815522	TR4A-6 RH forward tonneau panel.
850007	TR4-6 LH rear tonneau panel.
850008	TR4-6 RH rear tonneau panel.

TR4 owners please note that your centre deck and forward tonneau panels are different to TR4A-5. Currently these panels are available to special order or alternatively, please use TR4A-5 parts above.

910065RP	TR4-6 rear floor section. This panel does not include the hump and is therefore offered as a repair panel. Useful whilst the correct panel is not available, especially as the hump does not normally need replacing.
813650RP	TR4-5 boot lid repair section. This repair panel comprises the lower 6+ of the lid, with the inner frame. It is joined behind the number plate
RTR7274SH	TR250-5 Bracket under windscreen capping to stop crushing.

TR4-4A B POST COMPONENTS

TR4-4A complete B-Posts, part numbers 850275 and 85026 consisting of a front and back part are not available please order both front and back parts listed below to make a complete B-post assembly.

850275F	Front only of left hand B post
850276F	Front only of right hand B post
817412B	Back only of left hand B post
817413B	Back only of right hand B post
708093	TR4-6 LH B-post top gusset (to which hood frame is attached).
708094	TR4-6 RH B-post top gusset (to which hood frame is attached).

TR4-6 FRONT WING LIFTING EYES

These were fitted to TR5 as standard but can also be used on TR4-4A. Their purpose is to allow slings to be attached to lift the body off the chassis.

811944LE	TR5 LH lifting eye (and TR4-4A).
811945LE	TR5 RH lifting eye (and TR4-4A).
623588	TR6 LH lifting eye. As TR6 items are not available please use TR5 item 811944LE that can be fitted with little modification.
623589	TR6 RH lifting eye. As TR6 items are not available please use TR5 item 811945LE that can be fitted with little modification.

REPLICA RALLY TR4 BODY SHELL PARTS AND GENERAL IMPROVEMENTS.

Triumph Rallied four specially prepared Powder Blue TR4's from 1962-1964. These were registered 3VC, 4VC, 5VC and 6VC. Three cars remain; Parts of 5VC resided in a scrap yard in America for many years.

Having been honoured by Ian Cornish selecting us to rebuild 4VC, the only works TR4 Rally car remaining in England at the time, we are in a unique position to supply exact replicas of modifications used by the works A few items from our large list are included below. Please phone to discuss your requirements.

Neil Revington owns 6VC, and for a time had a part share in 3VC. Given that these cars were also rebuilt at Revington TR, the experience has providing RTR with an unrivalled depth of knowledge of TRIUMPH Rally preparation.

We also list here items which whilst not replications of Triumph works rally TR parts, are useful improvements to the TR4-5 body shell.

RTR8126K	Spot lamp bar . see Section 8 for details.
950109AL	Aluminium front wing LH
950110AL	Aluminium front wing RH
850457AL	TR4-5 LH Aluminium front wing filler
850458AL	TR4-5 RH Aluminium front wing filler
RTR7019	Pair of front wing vent ducts. Aluminium as used on works cars
RTR7060	Grill for front wing ducts. Exact original pattern. Cut to fit, 2 required.

RTR7019K	Kit Consisting of a pair of wing ducts & 2 grills.
RTR7066K	TR4-6 front wing drain kit. Triumph designed the front inner wing drains to exit directly onto the top of the hidden sill area, which soon rots away. This neat kit changes the exit point to outside of the car
RTR7086	Air scoop replacing air vent
RTR7160	Battery side support. 2 required
RTR7258K	TR4-4A Nacelle for RH front wheel arch for use when large air filters are fitted.
812775	Door skin. LH Steel
812776	Door skin. RH Steel

These steel door skins are TR5-6 parts as they are pierced to accept TR5-6 door handles. As the overall door shape of the TR4-4A is the same, they can be fitted to TR4-4A with the relatively simple modification of moving the door handle position and blanking the private door lock hole.

RTR7161	Door skin. LH Aluminium
RTR7162	Door skin. RH Aluminium

These aluminium door skins are unpierced and are therefore suitable for all TR4-6. The door handle and lock holes appropriate to either TR4-4A or TR5-6 will need to be cut.

RTR7073	Aluminium complete door LH
RTR7074	Aluminium complete door LH

Manufacture of these aluminium doors is very labour intensive.

In an effort to keep the cost down, the inner frame has been simplified. With a door panel fitted they look and work exactly as an original works rally TR4 doors.

These doors are extremely weak, as the original design was not intended to be made in aluminium. As a result Revington TR recommend these doors should only be considered for fitment to out and out competition cars where lightness is critical.

Customers should be aware of the likelihood of cracks occurring in these doors for which Revington TR cannot take responsibility.

RTR7126	TR4-6 Flexiglass door window
RTR7272	Pair of small winglets. Riveted to the top of the windscreen frame to stop the window moving out at speed.
903979AL	Roof panel hard top ally. See Surrey tops for alternatives
850475AL	Aluminium rear wing LH
850476AL	Aluminium rear wing RH
RTR7544K	TR4-5 Kit securing rear wing . no bumper. This kit comprises of two chrome dome headed bolts, nuts and washers to attach the rear wings to the side chassis stay when a rear bumper is not fitted.
908031AL	Aluminium bonnet with aluminium frame
908031ALW	Aluminium bonnet with lightened steel frame taken from an original steel bonnet an allowance will be made for your old bonnet. This is the type of bonnet used on the TR4 Works Rally cars
908031ALS	Aluminium bonnet skin only
908031ALF	Aluminium frame only
RTR7246K	Bonnet twist lock set, includes: - 1. Bonnet Dzus catches with long tail x 2 2. Dzus retainers x 2 3. Support plate under bulkhead lip x 2
RTR7263K	Set of bonnet springs and plates to spring up the bonnet when RTR7246K is used.
RTR7078	TR4-5 Bonnet strengthening kit prevents the rear edge of the bonnet from cracking
RTR7540	TR4-6 strengthener for bulkhead mounted steering column support bracket. Prevents cracking
813650AL	Aluminium boot lid
RTR7072	Aluminium boot lid with extra-large hinge plinths.

RTR7117	Pair large boot hinges
RTR7020	Tank support fits between sides of boot and supports rear of 18-gallon tank.
RTR7123SW	Flexiglass rear screen. Standard weight (see surrey tops section for other hard top parts)
RTR7123LW	Flexiglass rear screen. Light weight.
613277X	TR4-5 Boot lid seal, Snap on type, won't fall off like the original

TR4-5 BODY FITTINGS, BADGES etc.

708837BX	TR4A Bonnet badge. This badge is a modern stick on product which is raised up 2.25mm; not quite as high as the original, but appears very similar to the casual eye. This badge offers the benefit of being cheap and unlikely to fade, which the original plastic badge was prone to do. To complete the job you might need a new chromed outer ring Part No 708837R, please see below.
708837R	Chrome ring to go with RTR4500
622279X	TR5 Bonnet badge. This badge is a modern stick on product which is 2.25 mm thick. The badge has silvered edging and letters and looks similar to the casual eye. The badge offers the benefit of being cheap, will fit perfectly to the contour of the bonnet and will maintain its finish indefinitely.
BHH972G	Private door lock gasket TR5-6.
621773PX	TR5-6 Private door lock, security type. Replaces the original type.
TR4DLS	TR4-4A door lock set comprising 4 barrels, 1 cubby lock and 2 keys.
SPF0356K	TR4-5 Bonnet wedge in polyurethane. Longer lasting version of 611842. Kit of 4.
WFK45	Wing fitting kit for all wings

TR4, 4A, 250, 5 SURREY TOPS AND HARDTOPS

Firstly, to clarify the correct description of Hardtops and Surrey Tops, although the general arrangement of fixed rear window with removable roof panel is generally referred to as a 'Surrey Top' car, this is in fact not correct. The cloth section, which replaces the roof panel, is the 'Surrey Top'. The rear window and frame is called the 'back light' and the roof panel is self-explanatory.

Revington TR has developed an ingenious new Backlight design, which incorporates a roll-over bar (ROB). The Backlight frame is made from fibreglass, but uses for its strength an integral ROB with two backstays. The bar fits right up inside the fibreglass frame, thus affording maximum rollover protection, along with better rear visibility than with any other rollover bar available for use with a fixed backlight. The legs of the main hoop extend to the floor, whilst two rear stays attach to the top of the rear wheel arches. The main hoop is bolted to the B-posts too for added rigidity. Surrey tops and all three types of roof panel can be used in the normal manner.

Whilst the arrangement is much stronger with a ROB incorporated, Revington TR also offer a standalone fibreglass back light frame which is constructed of much thicker fibreglass and does not need a ROB. It should be noted that this configuration is not as strong as the original aluminium and certainly nowhere near as strong as the ROB supported part.

To complete the installation a fit up kit will be needed, these are found under the heading FIT UP KITS, ROOF PANELS & ACCESSORIES on page 8. To this might be added a surrey top or a hard top.

So, a typical installation might include: -

1 x RTR7122-3BRK	Backlight Frame and ROB
1 x RTR7172F	Fit up kit with Perspex window
1 x RTR6139BK	Surrey top kit

Please Note: Our backlight frame with and without the ROB or full cage has successfully been fitted to TR6 as well.

RTR7153 series TR4-6 Standalone Backlight Frame.

These Standalone backlight frames have no ROB and are a fibreglass facsimile of the original backlight frame, attaching to the body in the same way as the original aluminium part. These backlight frames include the internal bosses to accept the stainless steel finishers through which a surrey top or hard top is attached (these are omitted on the versions where a ROB is used).

RTR7153	Standalone backlight frame, untrimmed. This backlight frame is completely bare, it is supplied without a window or fittings. For a complete kit choose RTR7153FK, GK or XK below.
RTR7153FK	This kit included the backlight frame, a fitting kit with all rubbers and fixings, a Perspex window and a trim kit; everything you need to fit a rear backlight to your TR4-6.
RTR7153GK	This kit included the backlight frame, a fitting kit with all rubbers and fixings, a glass window and a trim kit; everything you need to fit a rear backlight to your TR4-6.
RTR7153XK	This kit included the backlight frame, a fitting kit with all rubbers and fixings, and a trim kit; everything you need to fit a backlight to your TR4-6 assuming you already have a rear window as one is not included in this kit.

RTR7122 Series TR4-6 Roll Over Bar with Backlight Frame.

The following part numbers in the series RTR7122 incorporate one bare fibreglass backlight frame and one ROB. The part number suffix dictates the type of ROB included in the package. Please be aware that you will need a fit up kit RTR7172F, RTR7172G or RTR7172X to complete the installation. RTR7172X would only be chosen if you already have a rear window.

A harness bar cannot be practically included in the design of the ROB due to the need to have sliding feet which are firmly secured in place on assembly. However, Revington TR have devised a suitable bolt on accessory listed here.

RTR7122-1AK	TR4 No diagonal brace, LHD or RHD
RTR7122-1BK	TR4A-6 No diagonal brace, LHD or RHD
RTR7122-2ALK	TR4 LHD Fixed diagonal
RTR7122-2BLK	TR4A-6 LHD Fixed diagonal
RTR7122-2ARK	TR4 RHD Fixed diagonal
RTR7122-2BRK	TR4A-6 RHD Fixed diagonal
RTR7122-3ALK	TR4 LHD Removable diagonal
RTR7122-3BLK	TR4A-6 LHD Removable diagonal
RTR7122-3ARK	TR4 RHD Removable diagonal
RTR7122-3BRK	TR4A-6 RHD Removable diagonal
RTR9148HB	TR4-6 Bolt on Harness bar

RTR7267 Series TR4-6 Full cage, with Backlight Frame.

This full cage is neat and unobtrusive; it incorporates a set of rear legs which bolt together to join the Cage from the cabin to the chassis without mutilating the body shell. See RTR9177 series in section 9 for a fuller description of the roll cage. The front hoop goes down the side of the dash panel, requiring a small amount to be removed from each side. Revington TR do not approve of mutilating a perfectly good original dash panel. To alleviate this problem we supply a solid aluminium panel, which can be adjusted to suit. Order Part no. RTR6133, see below.

RTR7267-1L	Full Cage with Harness Bar, with a fixed diagonal, LHD
RTR7267-1R	Full Cage with Harness Bar, with a fixed diagonal, RHD

FIT UP KITS, ROOF PANELS & ACCESSORIES

RTR7172F	Fit up kit, for detachable backlight including Perspex window, seals and fixings etc. The
----------	---

headlining for the centre panel and back light frame trimming material are not included.

RTR7172G
Fit up kit, for detachable backlight including glass window, seals and fixings etc. The headlining for the centre panel and back light frame trimming material are not included.

RTR7172X
Fit up kit, for detachable backlight, including seals and fixings etc. The headlining for the centre panel and back light frame trimming material are not included nor is the rear window. This kit should only be chosen if you already have a rear window in glass or Perspex.

Note: Where the backlight frame is being incorporated with our integral rollover bar, or full cage the back light frame would not normally be trimmed as the rear hoop fits right up inside the top hat section of the backlight frame making trimming near impossible. It is usual to simply paint the inside of the frame satin black. Please see section 6 for centre panel trim options.

RTR6153CK
This additional kit which might be required provides extra-long bolts to attach the rear of the Surrey Top and the hard top (as well as Allen keys to tighten them) to the backlight frame ONLY when our fibreglass backlight frame with Roll Over Bar in the RTR7122 series is in use.

RTR7275K
Spider handle for window winder as the original winder handles will not fit with the door bars of RTR7267 series cages in place.

902343
TR4-5 Rear glass screen. This is the part number for the original glass backlight fitted to TR4-5. The glass item is rarely if ever available, use RTR7123SW which is a Perspex equivalent, when fitted looks as good as new glass, but has a better light transmission factor than glass. As used on helicopter windscreens. TR4-5 Perspex screen, replaces 902343. Standard weight 3.2kg 5.15mm thick.

RTR7123SW

566330
566458
RTR6139BK
Surrey conversion kit black Everflex canopy
Surrey conversion kit white Everflex canopy.
Surrey top with header rail

See Section 6 for full rans and details of our new Surrey top arrangement.

903979AL
RTR7173K
Roof panel bare aluminium unpainted
Hard top kit. Aluminium. Complete kit of parts to assemble the detachable hard top, when painted (comes unpainted).

903979FG
RTR6133
Roof panel fibreglass
TR4-6 4mm thick aluminium dashboard blank no holes cut so that you can choose your own layout.

RTR6148
Protection bag for roof panel

TR4-5 ALUMINIUM PANELS

We can supply ANY body panels from a complete body-shell to individual body parts in aluminium. Where these items are supplied regularly, prices will be found in the price list under original part number with AL suffix. Unusual parts will be quoted for on request.

TR6 BODY SHELLS AND BODY SHELL COMPONENTS

Considering our heavy involvement with the production of TR2-3B panels, and to a lesser extent TR4-4A panels, it may be surprising to know that the first body panel Revington TR produced was in fact a TR6 front inner wing.

Whilst one side was still available from Leyland, Neil Revington quickly noted a need for the opposite hand, which had recently, became unavailable. The numbers of these RTR panels, both left-

hand and right-hand now gracing TR6s around the world runs into thousands, and although other manufacturers have attempted to make this commonly required panel, Revington TR's product remains one of the closest to the original form.

We also manufacture front wheel arches (all types), rear wheel arches, bulkhead repair section, and a host of aluminium panels for the competition minded.

TR6 BODY SHELLS

Complete body shells are available in all forms, early, late, LHD and RHD. We not only supply Heritage shells, but for the more discerning, we assemble our own shells with accurate panel gaps.

Revington TR body shells are manufactured from the best panels available on our own jigging. A selection of shell part numbers is shown below as a guide. Please enquire for a current quote.

575676	TR6 LHD Body shell in transport primer. Up to body number 50,000.
575675	TR6 RHD Body shell in transport primer. Up to body number 50,000.
575809	TR6 RHD Body shell in transport primer. From body number 50,001.
575810	TR6 RHD Body shell in transport primer. From body number 50,001.

TR5-6 BODY SHELL COMPONENTS

PARTS NOT SHOWN OR UNCLEAR IN TRIUMPH'S TR6 PARTS CATALOGUES

750229	TR4-6 bonnet stay bracket
624233	TR6 Boot lid stay bracket.
815959A	TR6 Rear inner wing aluminum LH.
RTR7281B	Nut-plate securing TR6 bonnet hinges
817564A	TR6 Rear inner wing aluminum RH.
821137G	TR4A-6 Seat slide rubber grip.
908356AL	TR6 Front inner wing aluminum LH.
908357AL	TR6 Front inner wing aluminum RH.
910065RB	TR5-6 Under rear floor bracket. The part that strengthens the rear floor where it bolts to the spring turret.
RTR7120	TR4-6 Panel, front wing to 'A' post. Part of front wing. State left or right.
RTR7121L	TR4-6 Panel, rear wing to B post. Part of rear wing. Left Hand.
RTR7121R	TR4-6 Panel, rear wing to B post. Part of rear wing. Right Hand.
910065RP	TR4-6 Rear floor repair panel. Does not have the diff hump fitted, use the existing one which most likely won't be rusty. Not an exact replica of the original, but will suffice while the original is not available.
910065RPA	TR4-6 same as 910065RP but in aluminum
812775	TR5-6 door skin LH
812776	TR5-6 door skin RH
621101LX	TR5-6 safety belt stiffening bracket at B post LH
621101RX	TR5-6 safety belt stiffening bracket at B post RH
RTR9065	TR2-6 universal anchor plate with 7/16+ UNF nut
603559	TR2-6 'T' tag securing wing loom.
815834SB	Bracket for column on bulkhead RHD.
603344	Door check strap guide.
RTR7168	Kit of parts to convert from LH D to RHD. Not limited to body parts, but excluding P1 parts.
RTR7169	Kit of parts to convert TR250/TR6 carburetor cars to TR5/TR6P1 specification.

FRONT BULKHEAD COMPONENT PARTS

The front bulkhead of a TR6 (and TR4-5) was normally supplied as one unit. For convenience of repair we produce the following section parts.

815834LT	TR5-6 LH top bulkhead panel for RHD. Extending down to battery tray
815835LT	As 815834LT for LHD
815834RT	TR5-6 RH top bulkhead panel for RHD Extending down to battery tray
815835RT	As 815834RT for LHD
815834C	TR4-6 Centre panel - battery tray with battery clamp lugs.
815837	TR5-6 LH front of bulkhead. LHD
811981	TR5-6 RH front of bulkhead. LHD
815836	TR5-6 LH front of bulkhead. RHD
811979	TR5-6 RH front of bulkhead. RHD
815834LB	TR4-5 LH lower corner bracket
815834RB	TR4-6 RH lower corner bracket

TR6 BODY IMPROVEMENTS, FITTINGS AND BADGES

908406ALS	Aluminum bonnet skin. The skin is riveted to a standard steel frame, which can be lightened before fitting.
908406ALSFS	Fitting service, ally skin to a rust free original frame
RTR7158	TR4-6 Bracket supporting original bonnet pull on bulkhead. This additional bracket lends support to weak original brackets.
850430FT	TR4-6 felt insert for side window channels.
RTR7254	TR6 mesh grill to cover the two holes in the lower valance.
722849X	TR6 late. Mesh Grill to fit under late TR6 grill when no vent flap is fitted. This mesh grill reduces the amount of debris that finds its way past the standard grill and into your eyes via the face level vents and prevents the plenum chamber filling up with leaves.
GAC6403X	TR6 Lock Set. Full set of locks for doors, boot, and ignition a cubby box.
WFK6	Wing Fitting screws to fit all wings

Please see section 9 for seat belts.

Please see section 9 for door mirrors.

TR4-6 UNDER WING SHIELDS

Jerry Vincent developed these fibreglass mouldings in the 1980s, they fit snugly up above all four wheels providing a permanent shield for the upper wing joints from mud, salt and stone damage.

Revington TR bought the moulds from Jerry some years ago ensuring this excellent product is available off the original moulds now and in the future.

RTR7182-4K	TR4-4A set wing shields.
RTR7182-5K	TR5 set wing shields.
RTR7182-6K	TR6 set wing shields.
RTR7259	TR4-6 shield extension LH rear. This shield covers the outside left face of the spare wheel tray. EFI petrol pumps are mounted here and some TR5-6PI owners mount their Bosch fuel pump conversions here. This shield reduces the exposure of the pump/filter combination to road dirt and water contamination.

TR7 & 8 BODY SHELLS AND BODY SHELL

COMPONENTS

TR7-8 BODY SHELLS

While TR7-8 body shells are plentiful, Revington TR offers a wide selection of repair panels rather than complete shells.

TR7-8 FRONT SUB FRAME BUSHES

KIT0104K-SF	Sub frame SuperPro Polyurethane Bush kit for all 4 positions consisting of:
1 off SPF2466K	Front sub frame; front polyurethane bush kit.
1 off SPF2468K	Front sub frame; rear polyurethane bush kit.

TR7-8 BODY SHELL REPAIR PANELS

RTR7188	Front flitch panel full LH
RTR7189	Front flitch panel full RH
RTR7190	Front flitch panel repair LH
RTR7191	Front flitch panel repair RH
RTR7192	Rear flitch panel full LH
RTR7193	Rear flitch panel full RH
RTR7194	Rear flitch panel repair LH
RTR7195	Rear flitch panel repair RH
RTR7196	Front turret complete LH
RTR7197	Front turret complete RH
RTR7198	Front turret complete less top LH
RTR7199	Front turret complete less top RH
RTR7200	Front turret complete top only LH
RTR7201	Front turret complete top only RH
RTR7202	Headlamp panel front
RTR7203	Headlamp panel rear
RTR7204	Front inner wheelarch outer lip LH
RTR7205	Front inner wheelarch outer lip RH
RTR7206	Front outer wing arch LH
RTR7207	Front outer wing arch RH
RTR7208	Front outer sill extension LH
RTR7209	Front outer sill extension RH
RTR7210	Rear inner wheel arch outer lip LH
RTR7211	Rear inner wheel arch outer lip RH
RTR7212	Rear outer wing arch LH
RTR7213	Rear outer wing arch RH
RTR7214	Rear outer wing lower fwd section LH
RTR7215	Rear outer wing lower fwd section RH
RTR7216	Door frame lower LH
RTR7217	Door frame lower RH
RTR7218	Door skin lower LH
RTR7219	Door skin lower RH
RTR7220	Front floor foot well LH
RTR7221	Front floor foot well RH
RTR7222	Rear floor foot well LH
RTR7223	Rear floor foot well RH
RTR7224	Rear trailing arm box repair kit LH
RTR7225	Rear trailing arm box repair kit RH
RTR7226	Rear floor to trailing arm LH
RTR7227	Rear floor to trailing arm RH
RTR7228	Outer rear trailing mount LH
RTR7229	Inner rear trailing mount LH
RTR7230	Outer rear trailing mount RH
RTR7231	Inner rear trailing mount RH
RTR7234	DHC mid sill repair LH
RTR7235	DHC mid sill repair RH

TR7-8 ALUMINIUM PANELS

We can supply ANY body panels from a complete body shell to individual body parts for all cars from TR2-TR8 in aluminium. Where these items are supplied regularly, prices will be found in the price list under original part number with AL suffix otherwise a price will be given on request.

FIBREGLASS PANELS TR2-8

Revington TR keeps a range of panels made from fibreglass to replace original components. Many other panels are either available to special order or can be made to your special requirements. A sample of our range is shown below. These can be used for lightness, cheapness, or simply to service a part which is no longer available in its original material. Race weight panels are available to special order. For race weight add suffix RW to the part number.

Beta TR3 fibreglass panels.

See BETA REPLICAS PARTS Section 7 page 4

RTR7047	TR2-3B bonnet, only available with louvres
RTR7139	TR2-3B front wing LH
RTR7140	TR2-3B front wing RH
RTR7141	TR2-3B rear wing LH
RTR7142	TR2-3B rear wing RH
901006FG	TR2-3 Front Panel
RTR7137	TR3A front panel
850043FG	TR2-3B outer quarter panel LH
850044FG	TR2-3B outer quarter panel RH
803780FG	TR2-3A boot lid skin
RTR7138	TR3A rear valance.
RTR7133	TR4-5 lower front valance
RTR7183	TR4-5 lower front valance with TR5 style central air hole and additional air dam chin
RTR7183LW	TR4-5 lightweight version of RTR7183
RTR7143	TR4-5 bonnet shell
RTR7144	TR4-5 bonnet complete
RTR7089	TR4-6 sill outer LH
RTR7090	TR4-6 sill outer RH
RTR7091	TR4-5 front wing LH
RTR7092	TR4-5 front wing RH
RTR7093	TR4-5 rear wing LH
RTR7094	TR4-5 rear wing RH
903979FG	TR4-5 roof panel
813650FG	TR4-5 boot lid skin with lock strengtheners
814016FG	TR6 LH front outer wing
814017FG	TR6 RH front outer wing
908370FG	TR6 upper inner rear valance
RTR7134	TR6 LH rear outer wing
RTR7135	TR6 RH rear outer wing
RTR7136	TR6 bonnet - shell only
RTR7145	TR6 front valance
XKC141FG	Boot lid TR7 early

TR2-6 TRANSMISSION COVERS

901550FG	TR2-3B fibreglass transmission tunnel.
901550AL	TR2-3B aluminium transmission tunnel.
713569FG	TR4-6 fibreglass transmission tunnel.
713569P	TR4-6 transmission tunnel moulded plastic.
713569GS	TR4-6 seal set. Transmission tunnel
713569FK	Fitting kit for transmission tunnels
809046	TR4A-6 hand -brake cover fibreboard.
809046FG	TR4A-6 hand-brake cover fibreglass.

WINDSCREENS and WINDSCREEN PARTS

TR3WSCB	TR2-3B windscreen corner bracket set, damping the main hoop to the lower rail.
RTRI7125	ITALIA front windscreen.
RTRI7249	ITALIA screen seal front and back. This seal is not ideal, but better than nothing. The original aluminium bead will fit.
RTR7270	TR3S windscreen stanchions. These special aluminium stanchions have been cast from an original Le Mans TR3S pair of stanchions. A must for those wanting a cut down screen with a touch of authenticity.
RTR7279K	TR4-6 heated front windscreen, laminated. Kit including wiring diagram and relays.

RTR7273	TR4-6, Spitfire, Herald, Vitesse, GT6. Front screen in new style Flexiglass, very strong and very clear. Please be sure your local laws for road use or competition allow the use of plastic front screens before ordering.
RTR7273-280	TR4-6, Spitfire, Herald, Vitesse, GT6. Front screen in new style Flexiglass, very strong and very clear. Please be sure your local laws for road use or competition allow the use of plastic front screens before ordering. Cut down to 280mm(11") as used on the Revington TRS

TR2-5 WING BEADING

TR3-5 wing beadings are available individually or as sets. See parts book for single units and below for sets.

NOTE 1: TR2 may use TR3-3A stainless beads but originally used cloth covered plastic bead matching body colour.

NOTE 2: TR5 bead should be painted body colour.

TR23WBS	Stainless wing bead set TR3-3B
TR45WBS	Stainless wing bead set TR4-5

BUMPERS

STAINLESS STEEL BUMPER KITS

These bumper kits are sold as complete sets for front and back and include overriders where appropriate

The bumpers and overriders are made from bright stainless steel and are polished to a high standard so that they are virtually indistinguishable from chromed steel.

RTR7284-AK	TR2-3 set of front bumper, two front overriders and two rear overriders
RTR7284-BK	TR3A set of front bumper, two front overriders and two rear overriders
RTR7284-CK	TR4 set of front bumper, two front overriders, rear bumper and two rear overriders
RTR7284-DK	TR4A, 250 & 5 set of front bumper, two front overriders, rear bumper and two rear overriders
RTR7284-EK	TR6 early set of front bumper, rear bumper centre section with number plate illumination cowl and two rear quarter bumpers
RTR7284-FK	TR6 late set of front bumper, rear bumper centre section without number plate illumination cowl and two rear quarter bumpers

BUMPER FITTING KITS
