

IS0010

REVINGTON TR TWIN BOX EXHAUST SYSTEM TR4A-6

Our system, unlike the much copied SAH pattern system, fits forward of the rear chassis cross tube, affording considerable additional ground clearance. The system is manufactured from high quality stainless steel and when fitted using our fitting kit, is supported by the chassis. Many similar systems mount to the flimsy spare wheel carrier.

NOT TO SCALE
GENERAL ARRANGEMENT
SHOWN FOR GUIDANCE
ONLY.

In many cases the ground clearance of this system is better than the standard TR5-6 system.

Part Number:

- | | |
|------------|---|
| RTR2006 | TR4A-6 Twin System (including down pipe) |
| RTR2006FK1 | Fitting Kit including hanger brackets TR4A |
| RTR2006FK2 | Fitting Kit including hanger brackets TR5-TR6PI |

NOTE:

TR250 and early TR6 Carb with single down pipe will need to use the later exhaust manifold.
