## New Replacement Steering Racks

### REVINGTON TR REINTRODUCES UNAVAILABLE PARTS

Revington TR have reintroduced steering racks for the complete TR range for both LH and RH.

Both types of TR4 rack, the vertically and horizontally mounted have not been available for some time. With the TR7 rack sharing a similar fate.

While the TR4A-6 racks have been on the market, some of them are on sale with incorrect dimensions. Typically the length of track rods are incorrect, resulting in steering geometry errors and incorrect mounting height which will introduce bump steer (for those that are unaware of the consequences of bump steer, this is a steering defect which results in the wheels steering as the wheels go up and down over bumps, thus resulting in the car jumping around on the road). Revington TR's racks are made to the exact specification of the originals.

### WHY BUY OUR RACKS

The racks are made by a high quality manufacturer of OE to current car manufacturers. The insides of the racks are made to modern standards, which shouldn't require any maintenance over their life.

**Also available for TR2-3 where a Revington TR steering rack conversion has been installed**

### PRODUCTS AVAILABLE

#### TR4 Early

RHD	305648
LHD	305647

#### TR4 Late

RHD	305930
LHD	305929

#### TR6

RHD	306829
LHD	306830

#### TR7

RHD	BAU5274
LHD	BAU5275
