

Heater kit illustrated suitable for TR2-3B and other classic Cars

UPGRADE YOUR TR HEATER FOR YEAR ROUND COMFORT

The cabin heating originally fitted to these cars has been likened to having an old lady blow politely on your knees. The Clayton Heater kit, specially commissioned by Revington TR, will *greatly improve your comfort* in the winter and those cooler summer days. The increased air flow will enable you to rapidly clear condensation from your windscreen.

TR2-3B COMPLETE HEATER KIT

The heater illustrated in the main picture is suitable for TR2-3B and features rotating eyeball vents, 2 speed squirrel cage blower and windscreen outlets.

TR4-6 HEATER UPGRADE KIT

Available as an *upgrade for TR4-6*, kit RTR1396-1K makes use of the original Smiths heater unit housing, but replaces the original impellor blades and motor with a modern unit featuring a "squirrel cage" type blower and quiet 3-speed motor. A much greater volume of air is forced through an aluminium radiator which produces 30% more heat than the standard aluminium radiator, providing ample warm air to enjoy open-top TR motoring on crisp winter mornings. This upgrade kit includes all switches and relays.

TR4-6 COMPLETE HEATER KIT

A completely *new heater for TR4-6* is also available incorporating all the features above, ready installed into a new housing. This new housing comes with 4 side air outlets to suit TR5-6. 2 blanks are provided, as TR4-4A owners only require 2 outlets. Please note that original TR4-4A glove boxes do not have a recess to accommodate the second pair of outlets found on the TR5, 250, 6. If your TR4-4A has not been changed for the later type please order Part No. 815747 fibreboard or 815747SAP for plastic.

PRODUCTS AVAILABLE

TR2-3B
Complete Heater Kit

RTR1395K

In addition to the basic heater unit the kit consists of a mounting cradle, 2 speed switch, 2 water hoses and sufficient air hose to connect both screen demist vents. The screen demist vents are not included in the kit. Fitting instructions are provided to make installation as painless as possible.

TR4-6
Heater Upgrade Kit

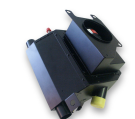

RTR1396-1K

Kit includes 3-speed squirrel cage motor/blower, high output aluminium radiator, upper casing and 3-speed switch. To be built into existing heater main casing.

TR4-6
